DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claims 1, 2, 3, 5, 6, 8, 9, 12, line 2 or line 3, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d). Further, regarding claims claims 3, 5, 8, 9, 12, line 18, "longitudinally into and along the," is vague and indefinite. It appears the term "trough" is missing at the end. Claim 16, line 5, "through" is vague and should be corrected to "trough".

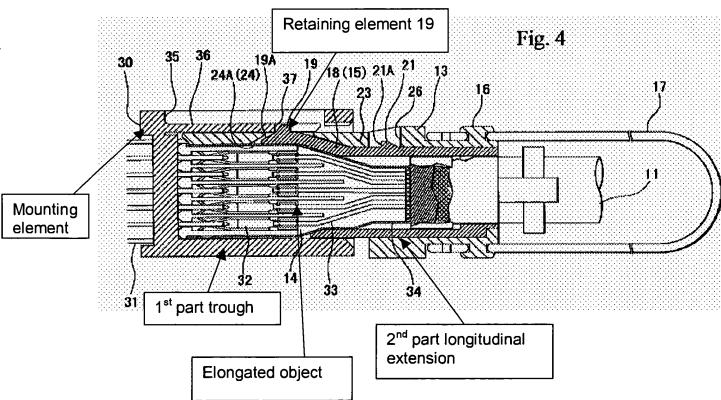

Claim Rejections - 35 USC § 102

Claims 16-18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Takahashi et al (US patent no. 6,447,170). Takahashi disclose a holder (see illustration below) for an elongated object, comprising: a first part (30) defining a trough (inner space) for receiving and supporting the object longitudinally along a longitudinal axis of the trough parallel to a bottom wall of the trough; and a second part (10) defining a longitudinal extension of the first part along the longitudinal axis for trough of also

Application/Control Number: 10/807,350

Art Unit: 3632

receiving and supporting the object longitudinally, wherein the second part is a slide constructed so that the second part of the first part along the longitudinal axis, and wherein j the second part has a retaining element (see illustration below) that moves over the object to hold the object on the holder in response to insertion of the second part into the trough of the first can be moved longitudinally into the trough part; wherein the retaining element is moved to a closed position by a wedging action as the second part moves into the trough of the first part; wherein the first part has a mounting element below its trough for attaching the first part to a substrate; wherein the first and second parts have cooperable fastening elements for fastening the second part to the first part upon insertion of the second part into the trough of the first part.

Allowable Subject Matter

Claim 19 is allowed.

Claims 1-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gilmour teaches two interconnecting parts with retaining element (76) which slides and is over the trough. German patent to Lin teaches to interconnecting parts with trough.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Korie H. Chan whose telephone number is 571-272-6816. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on 571-272-6788. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
